ACCESSIBILITY IN BARCELONA

“I’ve chosen Barcelona because of the good access’ facilities which offers the city to visitors who use, like myself, a wheelchair”

David Gabbai, a French physically disabled tourist, stands out the architectural and cultural patrimony and, above everything, access’ facilities.

“I haven’t found architectural obstacles in the places I’ve visited.”

“The experience has been fantastic - asserts David Gabbai. I’ve used public transport, such as the underground, FGC and Montjuic’s funicular to move around, the sidewalks are made to fit our disabilities and I haven’t found architectural obstacles in the places I’ve visited. I’ve gone to a concert at the “Palau de la Música Catalana”, I’ve visited Miró Foundation, “La Pedrera”, “Sagrada Familia’s Basilica” and the Music Museum. To stroll around “La Rambla” and the streets of the Gothic quarter is easy and smooth. Moreover the Barceloneta district and it’s beaches are places absolutely ready to welcome people in wheelchairs”.
